13 November 1954 25X1

SUBJECT

AREA: Electronics

DISTRIBUTION:

All PIs

TITLE/SIGNIFICANCE:

An R-600 radio-relay variant known as R-600-2MV.

COMMENT:

The variant consists of a pair of R-600 horns, one situated about 10-15 meters (30-50 feet) above the other on the tower. This increases reliability and range by introducing space and frequency diversity. The R-600-2MV is distinguishable and should be reported when identified. In this example it can be compared with the standard R-600 and the R-60/120 periscopic systems.
